### Template-loader postmortem

Django tried loading these templates, in this order:

Using engine `django`:

- `django.template.loaders.app_directories.Loader`: C:\Users\smith\djangogirls\myenv\Lib\site-packages\django\contrib\admin\templates\blog\post\_list.html (Source does not exist)
- `django.template.loaders.app_directories.Loader`: C:\Users\smith\djangogirls\myenv\Lib\site-packages\django\contrib\auth\templates\blog\post\_list.html (Source does not exist)
- `django.template.loaders.app_directories.Loader`: C:\Users\smith\djangogirls\blog\templates\blog\post\_list.html (Source does not exist)

The issue causing the ‘TemplateDoesNotExist’ will be fixed in the intro to HTML.
